Dear Daniel,

**Re: Letter of Recommend - Professional Structural Engineering Services
ICE Western: Addition**

Our recent past, as well as our ongoing working experiences with Heath Engineering has been very positive. We appreciate your proactive approach to resolving both design and construction challenges. On the ICE Western: Addition project, Heath Engineering has worked hard to provide the Owner with structural engineering solutions that are appropriate, practical, and cost effective.

Through construction, we have been impressed by Heath Engineering's prompt responses to the general contractor's RFIs, quick turn around of shop drawings, and timely and detailed field review reports.

With anticipation, we look forward to future opportunities to work together. Thank you for your professionalism.

Respectfully Submitted;

Henry Schlichter
